RELEASE NOTE for SD 5.6.4 Software Package
(5.6.4 application, 2.0.5 bootloader)
BUILD DATE 9-13-2017

SOFTWARE

SD SERIES SOFTWARE PACKAGE 5.6.4
(LIMITED AVAILABILITY)

This document describes the production release of the SD Series Software Package for CE-marked SD4 transceivers shipped after June of 2017 (i.e. for all SD4 H,I,J, and K transceivers).

** Important Upgrade/Downgrade Info **

The first SD Series software package to support the hardware enhancements required by the RE Directive 2014/53/EU for shipments after June of 2017 is 5.6.4. Therefore, customers are hereby informed that all SD4 H,I,J, and K transceivers, which include these hardware enhancements, will stop passing data if they are downgraded from 5.6.4.

5.6.4 is not available for download because

    A) All SD4 H,I,J, and K transceivers ship with 5.6.4   AND

    B) 5.6.4 is only production released for SD4 H,I,J, and K transceivers

A version greater than 5.6.4 will be available for download once this release is deemed production ready for all SD series transceivers.

New Features in 5.6.4
- N/A

Changes in 5.6.4
- SDx firmware supports the new 400MHz synthesizer hardware that meets the requirements mandated by the RE directive.
