**Subject:** Please be aware of the following when viewing Long Time Protection option information on the MVT tabular data screen for Spectra Series Molded Case Circuit Breakers.

**Applies To:** PMCS systems with Spectra Series MCCBs with PM Trips

**Long Time Protection Configuration:**

The Longtime Protection Configuration "Pickup" and "Delay" enable/disable parameters indicate whether the values for these parameters are fixed (enabled) or programmable(disabled). Fixed parameters are programmed at the factory and cannot be changed. Programmable parameters may be changed from the faceplate of the device.

**Keywords**

long time configuration, MicroVersaTrip, setup

**Related Notes**

none
