

D20 Combination Module

Overview

The D20 Combination module is composed of two detachable modules, WESTERM D20 C and WESDAC D20 C. The bottom module, WESTERM D20 C, is where all field wirings are terminated. The top module, WESDAC D20 C, processes the data acquired and communicates this to the main D20 processor, see Figure 2.

The D20C is an I/O module that is typically used for applications where small point-counts are desired. It supports Status Indication, Control Outputs, Analog Inputs and Outputs.

The D20C can be configured with:

- 16 digital inputs
- 8 momentary or dual function trip/close control outputs
- Optional 16 analog inputs
- Optional 8 analog inputs and 8 analog outputs

The D20C uses a faster clock speed to meet the increased processing power demand.

Interposing relays may be supplied using a WESTERM D20KI, as with the D20K.

A Local/Remote switch is provided to turn off relay coil power, and put the module off-line. An on/off-line indication is sent to the D20 main processor, which is available to the host as a pseudo-status.

Two DB 9 connectors are provided to allow daisy chaining of the D.20 Link. This link provides the communication channel over which the main D20 CPU processor can communicate with the WESDAC D20 C. Power for the WESDAC D20 C is also provided over the same cable assembly.

A single DB 9 connector is provided for the WESMAINT D20 maintenance port. This port allows communications between a VT 100 terminal or emulator, and the WESDAC D20 A.

The address jumper block for the WESDAC D20 A is located on the WESTERM.

Efficient, Cost Effective I/O Solutions

- The I/O modularity allows for efficient distributed I/O installations - minimizing wiring and enclosure requirements; this eliminates panel and reduces cost
- The active/passive design of the WESDAC/ WESTERM I/O modules allows users to quickly test, commission, and troubleshoot via hot swappable WESDAC modules, without disturbing wiring connections ; this significantly speeds up and simplifies maintenance activities

Ease of Use

- To first time users, both the software configuration setup and hardware installations are trivial; this makes it simple to install and maintain the combination module

Flexible and Reliable Operations

- The combination of digital input/output and analog input/output options makes this module versatile
- D20C supports up to 16 analog inputs and 8 analog outputs. It supports digital input and output while ensuring the secure operation of the control output interface by validating the initiated and timed control request from the D20/D200 Substation controller
- I/O modules are available to be ordered with either a DNP3 communication protocol option or a Standard/ Redundant D.20 link option. The D.20 link is a GE proprietary protocol

imagination at work

Distributed I/O Architecture

The D20 Remote Terminal Unit (RTU) design is based on a distributed-processing architecture including real-time data acquisition and control software. These I/O modules can be located close to the primary equipment being monitored and controlled as they receive and send data back to the master D20 main processor.

The I/O modules are intelligent modules that contain on-board microprocessors and are configured as slave devices to the D20 main processor. In the Figure 1 pictorial setup, specific I/O processing is distributed throughout the D20 RTU to the appropriate I/O modules.

The I/O modules support two communication protocols: (1) DNP3 protocol, and (2) high speed, high-level data link controller (D20 Link) in the form of poll and response messages protocol. The peripheral modules have serial communication ports and various types of field connections.

The hardware construction of each remote I/O module type is similar (see Figure 2.)

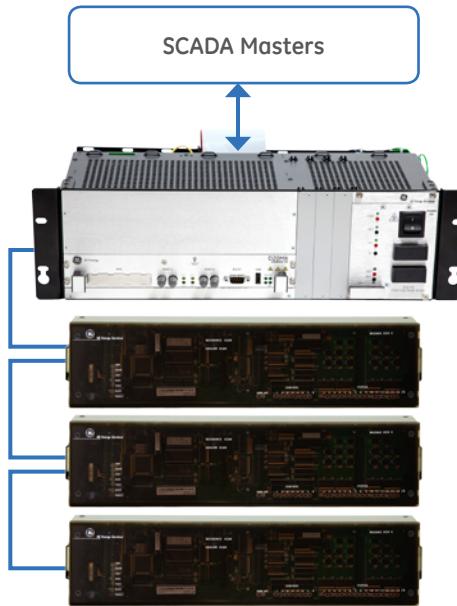

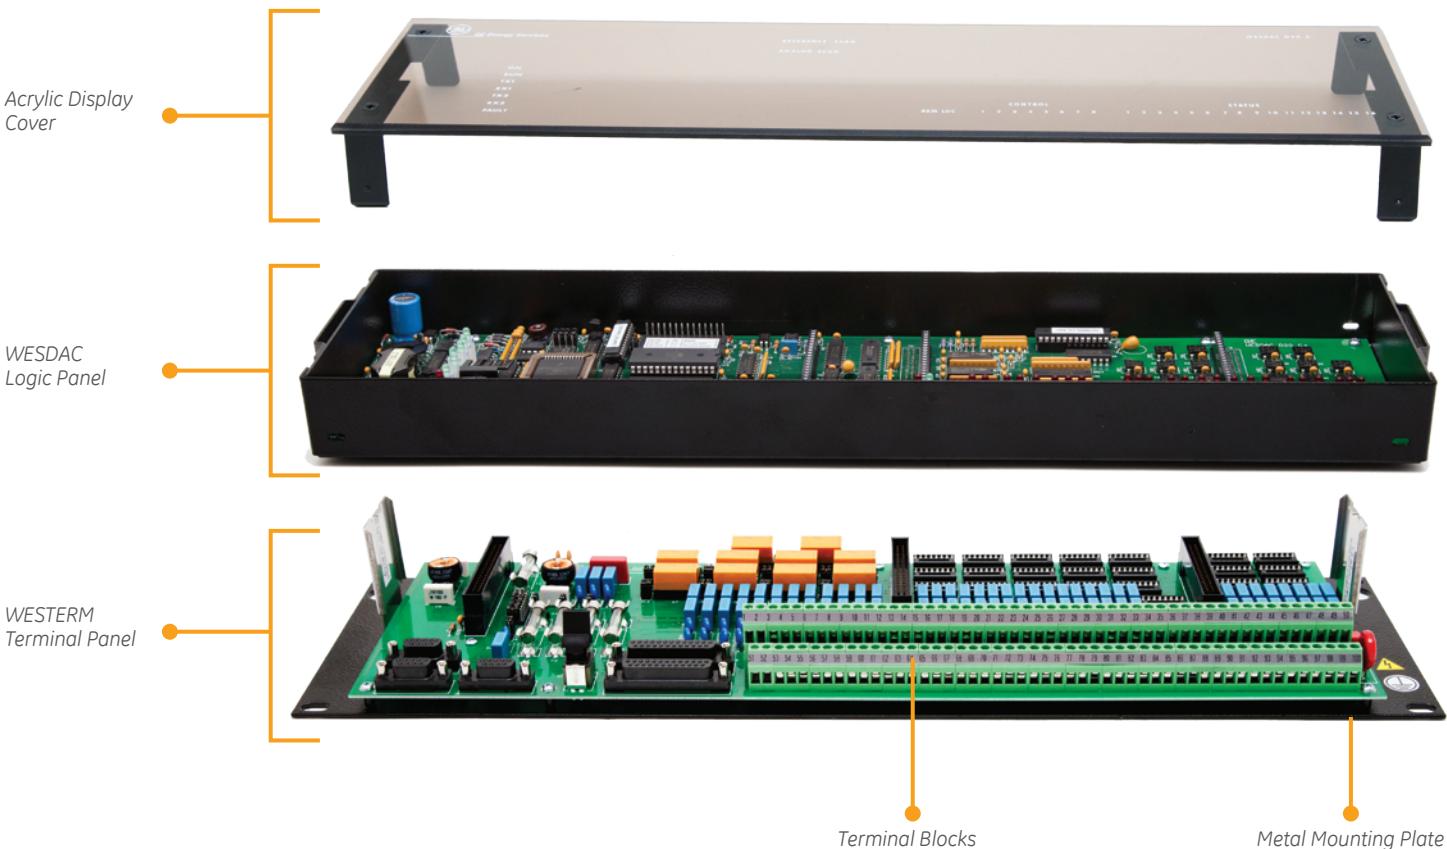

Figure 1: Simple architecture of I/O modules communicating to the D20 RTU

Figure 2: Architecture of I/O logic and termination panels

Analog Add-On Options

The analog input/output are available as add-on options for the D20C peripheral. They are mounted on the D20 C WESDAC. See Table 1 below.

Table 1: D20C Daughter Card Options

| D20C PERIPHERAL | DIGITAL INPUTS | CONTROL OUTPUTS | ANALOG INPUTS | ANALOG OUTPUTS |
|---------------------------------|----------------|-----------------|---------------|----------------|
| D20C | 16 | 8 | - | - |
| D20C with D20 C1 Daughter Board | 16 | 8 | 16 | - |
| D20C with D20 C2 Daughter Board | 16 | 8 | 8 | 8 |

Termination Types

D20 Control output module can be ordered with the following field termination options:

- Compression:**
Field wiring is terminated directly onto board-mounted screw terminal compression blocks (#12 AWG [2.05mm] max, blade screwdriver - 0.6 x 3.5 x 100 mm) on the D20 I/O Peripheral
- DB25:**
Field wiring is terminated onto the D20 I/O peripheral through DB25 connectors
- Compression Disconnect:**
Field wiring is terminated onto plug-on terminator blocks (#12 AWG [2.05mm] max, blade screwdriver - 0.6 x 3.5 x 100 mm), which then mate with board-mounted headers on the D20 I/O Peripheral

Technical Specifications

For a more complete description on the status, analog and control features of the D20 C, refer to the respective brochures of the D20S, D20A and D20K modules.

Table 2: D20C Specifications

| ITEM | DESCRIPTION |
|----------------------------|--|
| Processor | 8 bit Freescale 68HC11 MPU |
| Clock | 2 MHz MPU clock |
| Memory | <ul style="list-style-type: none"> • 24 KB EPROM • 32 KB static RAM • 512 bytes EEPROM |
| ANALOG INPUTS | |
| Physical | Plug in daughter board for 16 bipolar, differential inputs |
| Input Adapters | Refer to the Index for a list of available input adapters. |
| Accuracy | ±0.05% (voltage), ±0.1% (current) |
| Temperature Coefficient | ±10 ppm per °C |
| Resolution | 14 bits plus sign |
| Conversion Rate | <ul style="list-style-type: none"> • 275 ms for 16 inputs @ 60 Hz • 328 ms for 16 inputs @ 50 Hz |
| Dynamic Range of Converter | 125% of normalized full scale inputs |

| ITEM | DESCRIPTION |
|-------------------------------|--|
| ANALOG INPUTS | |
| Input Impedance | 44M Ohm ±5% (VDC) |
| Common Mode Rejection (60 Hz) | 95 dB |
| Normal Mode Rejection (60 Hz) | 60 dB |
| Over voltage Rating | ±35 VDC (normal mode) |
| ANALOG INPUTS/OUTPUTS | |
| Physical | Plug-in daughter board for 8 unipolar or bipolar (voltage only) outputs or 8 unipolar current outputs, and 8 bipolar inputs @ ±5 V (see Analog Inputs above) |
| Output Ranges | <ul style="list-style-type: none"> • 0 - 5, 0 - 10, ±5, ±10 V • 0 - 1, 0 - 5, 0 - 10, 0 - 20 mA |
| Accuracy | 0.1% (voltage), 0.15% (current) |
| Resolution | 12 bits plus sign |
| Maximum Output | 5 kohms @ 5 V out |
| STATUS INPUTS | |
| Physical | 16 optically isolated inputs in two groups of 8. Inputs in one group will share a common return and contact wetting. |
| Contact Wetting | ±12, ±24, ±48 or ±125 VDC |
| Current Burden | ±3 to ±6 mA per input |
| Scan Rate | 1.0 ms |
| Debounce | Selectable 1 to 255 ms |
| SOE Time Resolution | 1.0 ms |
| Overload Rating | 500 VDC (common mode to GND) |
| CONTROL OUTPUTS | |
| Physical | 8 relays plus two Master Trip/Close relays |
| Output Configurations | <ul style="list-style-type: none"> • 8 T/C pairs • 6 T/C + 1 R/L pairs • 4 T/C + 2 R/L pairs • 2 T/C + 3 R/L pairs • 4 R/L pairs • 8 isolated Form C contact outputs |
| Contact Duration | Programmable 1 to 215 ms in 1 ms intervals or 1 to 215 s in 1 s intervals (protocol dependent) |
| Contact Rating | 60 W max, 3 A max, 220 VDC max (1 Form-C or -A contact) |
| Coil Status Check | Every 500 µs |
| Switches | Local enable/disable switch |
| Component Isolation Rating | 1500 Vrms |
| Dielectric Rating | 1000 VDC |
| D.20 Link Ports | 2 |
| Maintenance Port | 9600 baud, RS-232 |
| Power Requirements | 20-60 VDC, 5 W typical; 11 W full load with 24 V contact wetting |
| Size | <ul style="list-style-type: none"> • D20C assembly: 19" x 5.25" x 2.5" • D20C analog input & analog input/output daughter boards: 8.5" x 3" |

Please note

1. For the rules regarding the combination of various options to build an order code, visit the online web:
<http://store.gedigitalenergy.com/ViewProd.asp?Model=D20C+Parts>
2. This ordering guide should ONLY be used with reference to the product documentation and it is assumed the user has read those documents. The ordering guide is for the use of experienced users who have extensive knowledge in the area and the products
3. The order defined in the ordering guide may not be final and can only be accepted once GE has reviewed and accepted the order. This document is only meant as a guide and by no means will portray the final order.
4. GE reserves the rights to change or modify the document without notice. The user is responsible to contact GE before placing an order to ensure the accuracy of the order code built.

D20C Spare Cross-Reference

| LEGACY PART NUMBER AND DESCRIPTION | SMART CATALOG NUMBER PREFIX AND DESCRIPTION |
|--|--|
| D20 COMBINATION WESTERM MODULES - LEGACY PART NUMBER | D20 COMBINATION WESTERM MODULES - NEW PART NUMBER PREFIX |
| (517-0169) - WESTERM D20C TYPE 1 VERSION 1 | (D20CS-T-1) - D20C LV (20-60VDC or D.20 Power), Compression Termination & DB25 for Interposer relays |
| (517-0180) - WESTERM D20 CD | (D20CS-T-2) - D20CD LV (20-60VDC or D.20 Power), DB25 Termination |
| (517-0326) - WESTERM D20 CB | (D20CS-T-3) - D20CB LV (20-60VDC or D.20 Power), Barrier Termination & DB25 for Interposer relays |
| (517-0217) - WESTERM D20 CX W/TB PLUGS | (D20CS-T-4) - D20CX LV (20-60VDC or D.20 Power), Compression Disconnect Termination & DB25 for Interposer relays |
| (517-0333) - WESTERM D20 CDI, 48V | (D20CS-T-6) - D20CDI LV (20-60VDC or D.20 Power), 48V Isolated Common & DB25 for Interposer relays |
| (517-0263) - WESTERM D20 CDI, 130V | (D20CS-T-7) - D20CDI LV (20-60VDC or D.20 Power), 130V Isolated Common & DB25 for Interposer relays |
| (517-0239) - WESTERM D20 C4Z, 48V DI | (D20CS-T-8) - D20C4Z HV 48V DI Compression Termination Analog Input Only |
| (517-0325) - WESTERM D20 C4Z2, 48V DI | (D20CS-T-5) - D20C4Z HV 48V DI Compression DisconnectTermination |
| (517-0253) - WESTERM D20 C4Z 110V DI | (D20CS-T-9) - D20C4Z HV 110V DI Compression Termination Analog Input Only |
| (517-0362) - WESTERM D20 C4Z2 24V DI | (D20CS-T-A) - D20C4Z2 HV 24V DI Compression Termination Analog Input & Output Allowed |
| (517-0363) - WESTERM D20 C4Z2 WITH PLUGS, 48V DI | (D20CS-T-C) - D20C4Z2 HV 48V DI Compression Disconnect Termination |
