Release Notes

Overview

GE Grid Solutions releases EnerVista D&I Setup Software Version 4.15 for Multilin 8 Series and Multilin Agile Protection Relays. Highlights of this release include the following:

8 Series

- IEC61850 GGIO1 status
- Firmware setting files
- Firmware file conversion errors

Multilin Agile

- Timer range on Logic designer
- Harmonic detection
- Timer on Logic Viewer

Release Date: **Sept 16, 2024**

The latest EnerVista Setup software is available at the same location. The software supports Windows 7, 8.1, 10 and 11.
Please contact your local Multilin sales representative or Multilin Customer Service Department for any questions regarding this upgrade.

Release details

Setup Software Version 4.15

8 Series

IEC61850 GGIO1 status
IEC61850 GGIO status corrected to reflect actual status after file conversion.

Firmware setting files
Setup software corrected to be able to open older firmware files (CID file) ≤ v1.4

Firmware file conversion errors
Corrected the following errors during firmware file conversions,

- Output relay type from changing after file conversion from 2.xx or 3.xx to 4.1x
- 489 to 889 - Directional power / Stage 1/2 SMin settings were not correctly converted
- 369 to 859 – The Reduced Voltage Starting / Start Control Relay was not correctly converted
- 369 to 859 - Unbalance Bias K Factor setting is set to '0' when Unbalance Bias is Off. Previously Unbalance Bias K Factor was set to '6'.

Multilin Agile

Timer range on Logic designer
Increased pick-up and drop-off timer range on Logic designer from 60000 to 14400000mS

Harmonic detection
Harmonic detection actual values mapped to the Metering page on setup software

Timer on Logic Viewer
Corrected Logic Editor to show timer values on the Logic Viewer
