Category: End of Service/Support

# End of Service/Support

**PRODUCT LINE:**  GIS  AIS  TRANSFORMER  HVDC  FACTS  SPS  CAPACITORS

**CATEGORY:**  Technical Enhancement  New Services Introduction  End of Service/Support

### Background

Grid Solutions is committed to customers' satisfaction with high quality products design, expertise supply, and up-to-date information provided on new features or products availability and products manufacturing discontinuation.

### End of service/support notification

GE Grid Solutions is discontinuing the production and sale of spare parts for **Oil Circuit Breakers** manufactured by its legacy company before 1990 as described in this document.

This notice applies to the following circuit breakers:

- **OR Model types:** OR1G, OR1K, OR1M, OR1R, OR2K, OR2M, OR2R, OR4K, OR4M, OR6K, OR6M
- **HPGE >170 Kv Model types:** HPGE 11-xx, HPGE 12-xx, HPGE 14-xx, HPGE 16-xx
- **HPGE <70 Kv Model types:** HPGE 7-xx, HPGE 8-xx

All products affected by this notice are today out of the warranty period.

This notice does not apply to any other model not explicitly listed. For the sake of clarity, **HPGE-9 and HPGE-10 models are still being serviced** in technical expertise and spare parts by Grid Solutions Services.

### GE replacement program solution

GE can provide support to upgrade existing installed base of affected products by supplying, installing and commissioning an alternative solution.

GE provides a range of live tank circuit breakers up to 800 kV, as well as hybrid and compact switchgear assemblies with state-of-the-art design and manufacturing techniques.

Additionally, a GE turnkey replacement solution will bring you the following benefits:

### Improved reliability

GE offers the latest technologies including SF<sub>6</sub> insulation, spring mechanism and a continuous online monitoring device to empower asset performance management strategy.

### Extended Warranty period

Risk of unplanned circuit breaker unavailability can be covered with the subscription of an extended warranty.

### Fast Cabling

Use of plug and play technology to limit electrical site activity.

### Reduced Outages

Leveraging decades of experience in engineering and project management GE provides a turnkey solution to reduce outages.

### Environment friendly

GE provides an end-to-end solution for the dismantled circuit breaker including the reconditioning of parts, SF<sub>6</sub> or oil recycling, and component valorisation.
