

Opus One Solutions from GE Digital Named a 2022 Global Cleantech 100 Company

- *Cleantech list recognizes companies that are committed to action on the climate crisis*
- *Opus One Solutions software enables broad, rapid adoption of renewables and Distributed Energy Resources (DERs) at all points on the grid*

SAN RAMON, Calif. - January 27, 2022 -- [GE Digital](#) today announced its newest acquisition, Opus One Solutions was named a [2022 Global Cleantech 100 Company](#) by Cleantech Group. The 100 companies on the list, chosen from more than 10,000 entrepreneurs, represent the private, independent and for-profit companies best positioned to deliver solutions that will take us from commitments to actions in the sprint to net zero.

Opus One Solutions from GE Digital is an innovator in software solutions with its advanced model-based software platform – GridOS® -- that enables the digital utility. These solutions help electric utilities optimize energy planning, operations, and market management to make decisions about how to integrate renewables and Distributed Energy Resources (DERs) at scale across the electric grid.

“Opus One is honored to be recognized as a leading Global Cleantech company for the fifth consecutive year. We are committed to helping transmission and distribution utilities achieve rapid decarbonization and adoption of renewables through grid modernization. Our team remains dedicated to empowering utilities as they navigate the energy transition and building innovative solutions to achieve these goals. We are proud of our technology and its ability to help utilities maximize the value of clean energy technologies, enable consumers, reduce total system costs, and embrace technology to solve grid and climate issues,” said Joshua Wong, CEO Opus One Solutions from GE Digital.

“We have the science and ingenuity to solve most of the issues and there is the investment capital, in both private and public markets, to propel a three-decade transformation, to net zero,” said Richard Youngman, CEO, Cleantech Group. “The 2022 Global Cleantech 100 companies show this in spades. What they, and hundred others like them, now need is braver regulators, policy makers and procurement departments, to enable such solutions to scale and go down their different cost curves much faster than the current trajectories.”

For detailed information on Opus One’s outlook as an innovator, visit Cleantech Group’s market intelligence platform [i3](#) and search for Opus One Solutions. [Download the report and meet the companies leading the sprint to net zero.](#)

The list includes entries from 94 countries and industries including Agriculture & Food, Enabling Technologies, Energy & Power, Materials & Chemicals, Resources & Environment and Transportation & Logistics. It combines Cleantech Group’s research data with qualitative judgements from nominations and insight from a global, 85-member Expert Panel of investors and executives from corporations and industrials active in technology and innovation scouting representing the global Cleantech community.
