

DYNAMIC POSITIONING SOFTWARE FAMILIARIZATION - M404

Course Description

DP Software Familiarization is intended for persons with an interest in the user interface (HMI) of GE Vernova's Dynamic Positioning Systems.

Learning Outcomes

To refresh & extend existing knowledge of DP operational principles and become fully familiar with the control console and displays through DP workstation practical exercises.

Prerequisites

Basic understanding of DP systems and vessel operating procedure.

Participants

This course can easily be adapted to the target audience, from operators who are looking to improve their knowledge of the system, to other personnel who would like to have a better understanding of DP operations but have little to no operational experience. It

is particularly suitable for experienced DP personnel who need to gain familiarity with a new HMI system.

Duration: 2 days

Location: USA – Houston/Pittsburgh, Korea – Busan, UK – Rugby, Brazil – Macaé

Applications:

GE Vernova Dynamic Positioning systems (including DP-TAMS and HCS) from release 4 software upwards, including SeaStream™, C-series and Enhanced A-series DP.
