

INVESTING IN AMERICA

GE Vernova, America's leading energy manufacturing company, is planning to invest nearly \$600 Million across more than a dozen U.S. factories and facilities over the next two years. The investments will help drive U.S. energy affordability, security, resilience, and competitiveness and enable the American manufacturing footprint to support global exports. With global energy needs forecasted to double, the substantial investments will help meet soaring customer demand, strengthen domestic supply chains, and continue developing cutting-edge American technology that helps power the world.

NEARLY \$600 MILLION INVESTMENT TO BOOST U.S. MANUFACTURING

GE Vernova plans to invest nearly **\$600 Million in U.S. facilities** to support domestic and global market demand while expanding American leadership. These investments are the first part of a larger previously announced \$9 billion cumulative global capex and R&D investment plan through 2028.

CREATING APPROXIMATELY 1,500 JOBS & STRENGTHENING DOMESTIC SUPPLY CHAINS

The investments will create approximately 1,500 new GE Vernova jobs in the U.S., enhancing the domestic manufacturing footprint and further supporting our 16,000+ direct and indirect U.S. suppliers.

DRIVING AMERICAN INNOVATION

Nearly \$100 Million planned investment into the expansion of GE Vernova's Advanced Research Center to keep the U.S. at the cutting edge of energy and push forward innovative technologies including direct air capture, alternative fuels for power generation, the grid of the future, critical infrastructure security and more.

EXPANDING U.S. LEADERSHIP IN GLOBAL ENERGY MANUFACTURING

New investments in U.S. facilities follow more than \$167 Million in funding in 2024 across a range of GE Vernova sites, helping create jobs to continue US leadership in energy manufacturing for the nation and exports for the world.
